OBJECTIVES AND FORMAT

ROUND 2: BUSINESS ANALYTICS REPORT

OBJECTIVES

This round assesses the ability to conduct data-driven market analysis from the perspective of a FinTech company evaluating potential target markets. Teams will clean and analyze the datasets, identify the highest-potential market segments, and justify their selection with both quantitative insights and qualitative reasoning.

Teams are also expected to integrate Vietnam's current macroeconomic conditions, banking trends, and insights into customer behaviour into analysis. The final output should convincingly recommend the most promising target market to the **bank's senior management team**.

FORMAT

- **Deliverables:** Written analytical report (Word document)
- **Note:** Data visualizations and figures are highly recommended for analytical report

COMPANY SELECTION

ROUND 2: BUSINESS ANALYTICS REPORT

COMPANY RANGE

Round 2 permits teams to select an organization within the broad scope of Banking and FinTech, including: traditional banks adopting technology in operations, digital banking platforms, neobanks, open banking providers, insurtech, wealthtech, regtech, and technology-enabled financial institutions.

CONDITIONS FOR SELECTED ORGANIZATIONS

Criteria	Description
Research capability	Sufficient public and accessible information is available to establish the business case
Data Accessibility	Data should be collected reasonably from authoritative sources with verifiable origins
Problem Clarity	A distinct problem, business objective, or development opportunity is identifiable for analysis
Development Potential	The organization is suitable for conversion into a solution, product, or strategic initiative in Round 3.

The appropriate company is not necessarily the largest or most well-known organization. It is the one that team can identify a clear business question and gather sufficient evidence to answer it.

REPORT STRUCTURE AND TASK DESCRIPTION

ROUND 2: BUSINESS ANALYTICS REPORT

REPORT STRUCTURE

This is the recommended report structure for the report:

1. Title page
2. Executive summary
3. Table of contents
4. Introduction
5. Findings of observations
6. Discussion/Main analysis
7. Recommendations
8. Conclusion
9. Appendices and References

TASK DESCRIPTION

As a business analyst of your chosen organization, team are required to:

- Clean and process the dataset appropriately.
- Identify meaningful patterns, trends, anomalies, customer behaviors, business opportunities, or operational issues.
- Prioritize one significant business problem or opportunity and explain why it matters.
- Use relevant macroeconomics, market, customer, industry context, etc. where it materially strengthens the analysis.
- Consider possible strategic responses and recommend one preliminary direction for further development in Round 3.

Important: Teams should clearly distinguish findings supported by data from assumptions, hypotheses, and areas that require further validation. Try to use as much visualization as possible for evidence.

ROUND 2: BUSINESS ANALYTICS REPORT

TASK DESCRIPTION

Note:

- Your analysis should consist of macro-environmental analysis and competitive landscape to identify the market gap
- The report must include high-quality, clearly labeled data visualizations to support your arguments
- Your report must be compelling, evidence-based argument supported by data from market research and insightful analysis

MINIMUM REQUIREMENT

- Business Context: Briefly introduce the selected organization, relevant market context, and the business area being investigated.
- Data Analysis & Key Insights: Present the most relevant analytical findings and explain their business implications.
- Problem/Opportunity Prioritization: Define the core issue and justify why it should be prioritized.
- Strategic Alternatives: Present possible approaches and relevant trade-offs.
- Preliminary Recommendation: Recommend one direction, which may be a product, service, operational improvement, campaign, or another relevant business solution.
- Validation Direction: State major assumptions, expected outcomes, relevant KPIs, and what still needs to be tested or validated.

Round 2 output is a strategic concept, not a fully developed solution. Qualified teams will continue developing it in Round 3A. Teams may refine their recommendation when supported by stronger evidence, feedback, or feasibility considerations.

IV RUBRICS

ROUND 2: BUSINESS ANALYTICS REPORT

Criteria	Max points	Weak	Adequate	Excelent
Business context and relevance	10	Describes the organization generically. The business area, stakeholders or relevance to Vietnam's banking or FinTech market is unclear.	Defines the organization and business area. Uses relevant market or customer context to explain why the investigation matters.	Frames a focused business question. Selects credible, relevant Vietnam context and explains how it changes the interpretation of the data.
Data preparation and quality	10	Cleaning and processing decisions are poorly documented. Important missing values, duplicates, inconsistencies or outliers are overlooked or handled without explanation.	Uses the dataset as the primary foundation. Documents appropriate cleaning and processing, with relevant data-quality issues identified and addressed.	Makes transformations traceable and justifies treatment of missing values, duplicates, inconsistencies and outliers where relevant. Explains remaining data-quality limitations.
Analytical method and reliability	5	Methods or comparisons are poorly matched to the business question. Key assumptions and limitations are unclear, weakening confidence in the approach.	Uses suitable methods, comparisons and metrics for the business question and available data. Explains main method choices, assumptions and limitations.	Justifies key analytical choices and considers material sensitivity, bias and representativeness. Explains what can and cannot be inferred without relying on unnecessary complexity.
Analytical findings and accuracy	15	Results are largely descriptive, inconsistent or affected by calculation errors. Important patterns are overlooked or not supported by clear evidence.	Presents accurate, relevant results that identify meaningful patterns, trends, segments or anomalies. Uses consistent metrics, denominators and comparisons.	Selects and quantifies the most material findings with accurate calculations and meaningful comparisons. Shows their scale, distribution or differences clearly.
Business insights and interpretation	10	Mainly repeats results without explaining why they matter. Customer or business implications are speculative or weakly connected to evidence.	Explains the business or customer implications of key findings. Connects interpretation to the selected organization and distinguishes supported insights from hypotheses.	Develops decision-relevant insights from the findings and context. Explains business consequences, considers alternative explanations and avoids unsupported causal claims.
Problem or opportunity prioritization	15	Names a broad issue or several disconnected issues. Priority is asserted without convincing evidence or business significance.	Defines one significant issue and affected stakeholders. Justifies priority using dataset evidence and business impact.	Compares competing priorities using explicit criteria. Supports the chosen issue's scale, urgency and strategic relevance while acknowledging uncertainty.
Strategic alternatives and trade-offs	10	Provides one option or superficial alternatives. Relevant benefits, costs, risks and compromises are largely absent.	Presents plausible alternatives and compares relevant benefits, feasibility, risks and trade-offs for the prioritized issue.	Evaluates genuinely distinct options against consistent criteria. Explains what each sacrifices and why the preferred direction outweighs credible alternatives.

ROUND 2: BUSINESS ANALYTICS REPORT

Criteria	Max points	Weak	Adequate	Excelent
Preliminary recommendation	10	Recommendation is vague, unrelated to the findings or unsupported by a clear explanation of how it could create value.	Proposes a clear initial direction. Connects it to the prioritized issue, target stakeholders, expected value and broad feasibility.	Selects a focused strategic concept whose mechanism follows from the evidence. Defines its scope, value logic and main feasibility assumptions.
Validation direction	10	Assumptions and expected outcomes are unclear. KPIs are vague and no useful next validation step is identified.	States key assumptions, expected outcomes, relevant KPIs and what should be tested or validated in Round 3.	Prioritizes the most consequential uncertainties. Proposes practical tests and measurable KPIs that would confirm, refine or challenge the concept.
Report clarity and evidence transparency	5	Structure or visuals obscure the argument. Sources are difficult to trace and facts, assumptions and projections are frequently mixed.	Report is logically organized, with readable visuals and traceable sources. Distinguishes facts, interpretation, assumptions and projections.	Presents a concise, easy-to-follow argument with purposeful visuals and clear source references. Limitations and uncertainty remain visible throughout.

SUBMISSION DETAILS

ROUND 2: BUSINESS ANALYTICS REPORT

RULES

1. Format: The submission is a written report and is submitted in PDF format
2. Length: Each team may submit a written report with 3500 words maximum (excluding Executive Summary, Table of Contents, Appendices, Reference List)
3. Language:
 - Submission must be in English
 - Technical terms from other languages may be used if an English translation is provided
 - Teams must choose appropriate terms to avoid possible misunderstanding

SUBMISSION

- Deadline: 21:00, 27/9/2026
- The file should be named: [FBAR2_2026]_Team's name
- Supporting analytical files may be submitted through a Google Drive link (e.g. Excel, dashboard, R/Python notebook, or equivalent). Be mindful to open public access

NOTES

- Teams must compress the final file before submission
- Late submissions and extensions will NOT be accepted under any circumstances
- Each team must submit the final work **ONCE ONLY**, using the team leader's email address that was used for Round 1 registration, via this [LINK](#)
- Each email address is only allowed to fill this form once; responses cannot be edited after submission
- Teams are advised to review their work carefully and submit at least 30 minutes before the deadline to avoid technical issues.
